Alexandria, VA 22313-1450

Sir:

REQUEST FOR REFUND

Applicant hereby requests a refund in the amount of \$310.00 for the two month extension of time fee charged to Davis Munck Deposit Account No. 50-0208 on April 19, 2005. A copy of the Deposit Account Statement dated April 2005 is attached.

Applicants filed a Notice of Appeal on February 22, 2005 and a Request for Continued Examination in response to the Notice of Appeal on April 4, 2005 (copies attached). Therefore, no extension of time was necessary in connection with the filing of the Request for Continued Examination.

Please issue a credit in the amount of \$310.00 to Davis Munck Deposit Account No. 50-0208 for this overpayment.

Adjustment date: 12/29/2005 EEKUBAY1

First Named Inventor	JOHN E. GAVLIK
Art Unit	2154
Examiner Name	ASHOKKUMAR B. PATEL
Attorney Docket Number	P04762 (NAT115-04762)

This is a Request for Continued Examination (RCE) under 37 CFR 1.114 of the above-identified application. Request for Continued Examination (RCE) practice under 37 CFR 1.114 does not apply to any utility or plant application filed prior to June 8, 1995, or to any design application. See Instruction Sheet for RCEs (not to be submitted to the USPTO) on page 2.

1. **Submission required under 37 CFR 1.114** Note: If the RCE is proper, any previously filed unentered amendments and amendments enclosed with the RCE will be entered in the order in which they were filed unless applicant instructs otherwise. If applicant does not wish to have any previously filed unentered amendment(s) entered, applicant must request non-entry of such amendment(s).

- a. ☐ Previously submitted. If a final Office action is outstanding, any amendments filed after the final Office action may be considered as a submission even if this box is not checked.
- i. ☐ Consider the arguments in the Appeal Brief or Reply Brief previously filed on _____
- ii. ☐ Other _____
- b. ☒ Enclosed
- i. ☒ Amendment/Reply
- ii. ☐ Affidavit(s)/Declaration(s)
- iii. ☐ Information Disclosure Statement (IDS)
- iv. ☒ Certificate of Mailing: postcard receipt;
Other Fee Transmittal for FY 2005 (in duplicate) _____

2. Miscellaneous

- a. ☐ Suspension of action on the above-identified application is requested under 37 CFR 1.103(c) for a period of _____ months. (Period of suspension shall not exceed 3 months; Fee under 37 CFR 1.17(f) required)
- b. ☐ Other _____

3. Fees

- The RCE fee under 37 CFR 1.17(e) is required by 37 CFR 1.114 when the RCE is filed. The Director is hereby authorized to charge the following fees, or credit any overpayments, to Deposit Account No. 50-0208
- a. ☒ The RCE fee required under 37 CFR 1.17(e)
- i. ☒ RCE fee required under 37 CFR 1.17(e)
- ii. ☐ Extension of time fee (37 CFR 1.138 and 1.17)
- iii. ☐ Other _____
- b. ☒ Check in the amount of \$ 780.00 enclosed
- c. ☐ Payment by credit card (Form PTO-2038 enclosed)

WARNING: Information on this form may become public. Credit card information should not be included on this form. Provide credit card information and authorization on PTO-2038.

AMENDMENT AND RESPONSE TO OFFICE ACTION

In response to the Office Action dated September 22, 2004 and the Notice of Appeal filed on February 22, 2005, the Applicants respectfully request continued examination of the above-identified patent application.

Please amend the above-identified patent application as follows.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

IN THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) An apparatus for controlling a physical layer interface of a network interface card in real time, said apparatus comprising:

a first memory capable of storing a multitasking control program, said multitasking control program comprising a main routine and a plurality of subroutines sequentially callable by said main routine;

a second memory capable of storing a plurality of multitasking vectors associated with said multitasking control program; and

a microcontroller capable of executing said multitasking control program;

wherein program execution control is transferred from said main routine to a first one of said plurality of subroutines when said first subroutine is called by said main routine; [[and]]

wherein said first subroutine, upon encountering a decision point in said first subroutine that is not yet capable of being decided, updates a first one of said plurality of multitasking vectors associated with said first subroutine with an address of said decision point and transfers program execution control back to said main routine; and

wherein the main routine, after sequentially transferring program execution control to each remaining subroutine in the plurality of subroutines, again transfers program execution control from the main routine to the first subroutine at the address of the decision point contained in the first multitasking vector.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

2. (Currently Amended) The apparatus as set forth in Claim 1 wherein said main routine uses ~~said first~~ other multitasking vectors to subsequently and sequentially transfer program execution control back to ~~said first~~ each remaining subroutine at [[said]] an address of ~~said first~~ a decision point contained in each of the other multitasking vectors.

3. (Previously Presented) The apparatus as set forth in Claim 2 wherein said first memory comprises a read-only memory (ROM) associated with said microcontroller.

4. (Previously Presented) The apparatus as set forth in Claim 3 wherein said second memory comprises a random access memory (RAM) associated with said microcontroller.

5. (Previously Presented) The apparatus as set forth in Claim 4 wherein said ROM and said RAM are internal to said microcontroller.

6. (Previously Presented) The apparatus as set forth in Claim 4 wherein at least one of said ROM and said RAM comprises an external device coupled to said microcontroller.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

7. (Previously Presented) The apparatus as set forth in Claim 2 wherein said first memory and said second memory comprise a random access memory (RAM) associated with said microcontroller.

8. (Previously Presented) The apparatus as set forth in Claim 7 wherein said RAM comprises an external device coupled to said microcontroller.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

9. (Currently Amended) A processing system comprising:

a data processor; and

a network interface card for coupling said processing system to a data network, said network interface card comprising an apparatus for controlling a physical layer interface of said network interface card in real time, said apparatus comprising:

a first memory capable of storing a multitasking control program, said multitasking control program comprising a main routine and a plurality of subroutines sequentially callable by said main routine;

a second memory capable of storing a plurality of multitasking vectors associated with said multitasking control program; and

a microcontroller capable of executing said multitasking control program;

wherein program execution control is transferred from said main routine to a first one of said plurality of subroutines when said first subroutine is called by said main routine; [[and]]

wherein said first subroutine, upon encountering a decision point in said first subroutine that is not yet capable of being decided, updates a first one of said plurality of multitasking vectors associated with said first subroutine with an address of said decision point and transfers program execution control back to said main routine; and

wherein the main routine, after sequentially transferring program execution control to each remaining subroutine in the plurality of subroutines, again transfers program execution control from the main routine to the first subroutine at the address of the decision point contained in the first multitasking vector.

DOCKET NO. P04762

15. (Previously Presented) The processing system as set forth in Claim 10 wherein said first memory and said second memory comprise a random access memory (RAM) associated with said microcontroller.

16. (Previously Presented) The processing system as set forth in Claim 15 wherein said RAM comprises an external device coupled to said microcontroller.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

17. (Currently Amended) For use in a network interface card having a physical layer interface controllable by a microcontroller embedded therein, a method of operating the microcontroller comprising the steps of:

storing a multitasking control program, the multitasking control program comprising a main routine and a plurality of subroutines sequentially callable by the main routine;

storing a plurality of multitasking vectors associated with the multitasking control program; and

executing the multitasking control program in a microcontroller;

transferring program execution control from the main routine to a first one of the plurality of subroutines when the first subroutine is called by the main routine;

when the first subroutine encounters a decision point in the first subroutine that is not yet capable of being decided, updating a first one of the plurality of multitasking vectors associated with the first subroutine with an address of the decision point; [[and]]

transferring program execution control back to the main routine; and

after sequentially transferring program execution control from the main routine to each remaining subroutine in the plurality of subroutines, again transferring program execution control from the main routine to the first subroutine at the address of the decision point contained in the first multitasking vector.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

18. (Currently Amended) The method as set forth in Claim 17 further comprising the step of using ~~the first~~ other multitasking vectors to subsequently and sequentially transfer program execution control from the main routine back to ~~the first~~ each remaining subroutine at ~~[[the]]~~ an address of ~~the first~~ a decision point contained in each of the other multitasking vectors.

19. (Previously Presented) The method as set forth in Claim 18 wherein the first memory comprises a read-only memory (ROM) associated with the microcontroller.

20. (Previously Presented) The method as set forth in Claim 19 wherein the second memory comprises a random access memory (RAM) associated with the microcontroller.

21. (Previously Presented) The method as set forth in Claim 20 wherein the ROM and the RAM are internal to the microcontroller.

22. (Previously Presented) The method as set forth in Claim 20 wherein at least one of the ROM and the RAM comprises an external device coupled to the microcontroller.

PATENT

REMARKS

Claims 1-22 were pending in this application.

Claims 1-22 have been rejected.

Claims 1, 2, 9, 10, 17, and 18 have been amended as shown above.

Claims 1-22 remain pending in this application.

Reconsideration and full allowance of Claims 1-22 are respectfully requested.

I. REJECTION UNDER 35 U.S.C. § 103

The Office Action rejects Claims 1-22 under 35 U.S.C. § 103(a) as being unpatentable over U.S. Patent No. 6,182,238 to Cooper ("Cooper") in view of U.S. Patent No. 4,530,051 to Johnson et al. ("Johnson"). This rejection is respectfully traversed.

In *ex parte* examination of patent applications, the Patent Office bears the burden of establishing a *prima facie* case of obviousness. (MPEP § 2142; *In re Fritch*, 972 F.2d 1260, 1262, 23 U.S.P.Q.2d 1780, 1783 (Fed. Cir. 1992)). The initial burden of establishing a *prima facie* basis to deny patentability to a claimed invention is always upon the Patent Office. (MPEP § 2142; *In re Oetiker*, 977 F.2d 1443, 1445, 24 U.S.P.Q.2d 1443, 1444 (Fed. Cir. 1992); *In re Piasecki*, 745 F.2d 1468, 1472, 223 U.S.P.Q. 785, 788 (Fed. Cir. 1984)). Only when a *prima facie* case of obviousness is established does the burden shift to the applicant to produce evidence of nonobviousness. (MPEP § 2142; *In re Oetiker*, 977 F.2d 1443, 1445, 24 U.S.P.Q.2d 1443, 1444 (Fed. Cir. 1992); *In re Rijckaert*, 9 F.3d 1531, 1532, 28 U.S.P.Q.2d 1955, 1956 (Fed. Cir. 1993)). If the Patent Office does not produce a *prima facie* case of unpatentability,

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

then without more the applicant is entitled to grant of a patent. (*In re Oetiker*, 977 F.2d 1443, 1445, 24 U.S.P.Q.2d 1443, 1444 (Fed. Cir. 1992); *In re Grabiak*, 769 F.2d 729, 733, 226 U.S.P.Q. 870, 873 (Fed. Cir. 1985)).

A *prima facie* case of obviousness is established when the teachings of the prior art itself suggest the claimed subject matter to a person of ordinary skill in the art. (*In re Bell*, 991 F.2d 781, 783, 26 U.S.P.Q.2d 1529, 1531 (Fed. Cir. 1993)). To establish a *prima facie* case of obviousness, three basic criteria must be met. First, there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. Second, there must be a reasonable expectation of success. Finally, the prior art reference (or references when combined) must teach or suggest all the claim limitations. The teaching or suggestion to make the claimed invention and the reasonable expectation of success must both be found in the prior art, and not based on applicant's disclosure. (MPEP § 2142).

Claims 1, 9, and 17 have been amended to recite that a "plurality of subroutines" are "sequentially callable" by a "main routine." Claims 1, 9, and 17 have also been amended to recite that the main routine, after "sequentially transferring program execution control" to "each remaining subroutine in the plurality of subroutines," again transfers "program execution control" to the "first subroutine" at an "address of [a] decision point contained in [a] first multitasking vector."

The Office Action acknowledges that *Cooper* fails to disclose a "multitasking control program" that includes a "main routine" and a "plurality of subroutines." (*Office Action*, Page 5.

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

Last paragraph). Based on this acknowledgement, *Cooper* also fails to disclose that a "plurality of subroutines" are "sequentially callable" by a "main routine" as recited in Claims 1, 9, and 17.

The Office Action also acknowledges that *Cooper* fails to disclose a "main routine" calling a "first subroutine," where the first subroutine updates a "first multitasking vector" with an "address" of a "decision point" that cannot be decided and transfers program execution control back to the main routine. (*Office Action, Page 5, Last paragraph – First, paragraph*). Based on this acknowledgement, *Cooper* also fails to disclose that a main routine, after transferring program execution control to the "first subroutine" and then sequentially to "each remaining subroutine in the plurality of subroutines," again transfers program execution control to the "first subroutine" at an "address of the decision point contained in the first multitasking vector" as recited in Claims 1, 9, and 17.

Johnson also fails to disclose, teach, or suggest these elements of Claims 1, 9, and 17.

Johnson recites that a "home process" executing on a "home processor" can invoke a "remote process" on a "remote processor." (*Abstract*). The "home process" may operate in various states, including states in which the "home process" is waiting for an action to occur or a message to be received. (*Col. 7, Lines 11-62*). For example, the "home process" may call a "remote process" and then enter a dormant state, and the "home process" remains in the dormant state until the "home process" receives a return message from the "remote process." (*Col. 7, Line 63 – Col. 8, Line 28*). The "remote process" may itself invoke execution of other processes and enter a dormant state. (*Col. 10, Lines 27-63*).

Johnson simply recites that a "home process" on one processor may invoke a "remote

DOCKET NO. P04762
SERIAL NO. 09/713,643
PATENT

process" on another processor, and the "remote process" may itself invoke functions on a different processor. However, *Johnson* lacks any mention that the remote processes are "sequentially callable" by the home process, where a first "remote process" is called and then all remaining "remote processes" are sequentially called before the first "remote process" is called again. As a result, *Johnson* fails to disclose, teach, or suggest a "main routine" and a "plurality of subroutines sequentially callable" by the "main routine," where "program execution control" is sequentially transferred to a first subroutine, to each remaining subroutine, and again to the first subroutine as recited in Claims 1, 9, and 17.

For these reasons, the proposed *Cooper-Johnson* combination fails to disclose, teach, or suggest all elements of Claims 1, 9, and 17 (and their dependent claims). Accordingly, the Applicants respectfully request withdrawal of the § 103 rejection and full allowance of Claims 1-22.

II. CONCLUSION

The Applicants respectfully assert that all pending claims in this application are in condition for allowance and respectfully request full allowance of the claims.

SUMMARY

If any issues arise, or if the Examiner has any suggestions for expediting allowance of this application, the Applicants respectfully invite the Examiner to contact the undersigned at the telephone number indicated below or at wmunck@davismunck.com.

The Applicants have included the appropriate fee to cover the cost of a REQUEST FOR CONTINUED EXAMINATION. The Commissioner is hereby authorized to charge any additional fees connected with this communication (including any extension of time fees) or credit any overpayment to Davis Munck Deposit Account No. 50-0208.

Respectfully submitted,

Sir:

PETITION FOR EXTENSION OF TIME

Applicant respectfully requests a one (1) month extension of time for filing a Notice of Appeal in response to the final Office Action mailed September 22, 2004 (and the Advisory Action mailed January 24, 2005).

The Applicants believe that only a one (1) month extension of time is required.

In response to the Office Action dated September 22, 2004, the Applicants filed an AMENDMENT AND RESPONSE on November 22, 2004. The Applicants therefore responded to the

ATTORNEY DOCKET NO. P04762 (NAT115-04762)
U.S. SERIAL NO. 09/713,643
PATENT

Office Action within two months of the mailing date of the Office Action. The Examiner issued an Advisory Action on January 24, 2005, which was not within three months from the mailing date of the Office Action.

According to the Office Action and pursuant to MPEP § 706.07(f), the shortened statutory period for replying to the Office Action expires three months from the date of the final rejection or on the mailing date of an Advisory Action, whichever is later. As a result, the shortened statutory period for replying to the Office Action expired on January 24, 2005 (the mailing date of the Advisory Action). The Applicants therefore only require a one (1) month extension of time.

The response period expired on January 20, 2005, and if this Petition for Extension of Time is granted, the new response date will be February 20, 2005.

A check in the amount of \$620.00 is enclosed for the Notice of Appeal filing fee (\$500.00) and one (1) month extension of time fee (\$120.00). The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to Davis Munck Deposit Account No. 50-0208.
